An Upside-Down World, #2

- The only text in this report are these very words, here on page one.
- The 150+ charts selected and depicted herein are remarkably uniform...
- If and as they continue to play out the way they've been playing out the past several weeks/months... it's "a lock" as to where the market is headed.
- Meanwhile, three things to note, when going through the charts:

1) The names are presented in alphabetical order; there is no bias by market cap or sector or any other consideration

2) The arrows drawn are red, not green (read: the stocks herein are judged headed up in the charts (down, in real life)

3) The title of the report should be kept in mind

Finally, on pages 152-156, you'll see similar charts for the S&P 500 Index, the Russell 3000 Index, the NASDAQ Composite Index, the Russell 2000 Index and the MSCI ALL Country World Index.

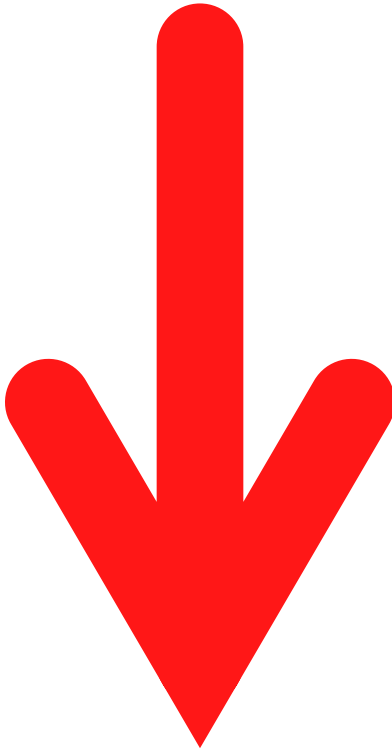

Trade well,

-Carter
